DETAILED ACTION

This office action is in response to the application filed 4/14/2006.

Currently, claims 19-39 are pending. Claims 1-18 have been cancelled.

Election/Restrictions

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 19-29 and 34-39, drawn to a patterning method.

Group II, claim(s) 30-33, drawn to a field effect transistor.

The inventions listed as Groups I and II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: The method of claims 19-29 and 34-39 produces the projection of a substrate described in claims 30-33. However, this is not a special technical feature over the prior art, since Maegawa (US 2003/0141546) teaches in FIG. 15 the projection of a substrate (1) using a patterning technique. Therefore, no special technical feature exists between the claims of Group I and Group II.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.
